

*C1*

- (c) defining a general purpose network presentation including data representative of the fetal condition signal;
- (d) transmitting the presentation to a general purpose display station via a configurable network link upon receipt of a command from the display station, wherein the display station includes a general purpose computer and a browser operating to display the network presentation;
- (e) updating the presentation to include updated data representative of the fetal condition; and
- (f) retransmitting the presentation to the general purpose display station.

---

*Subj* 28. (Twice Amended) A system for monitoring a fetal condition, the system comprising:

- means for detecting a fetal parameter of interest and for generating a fetal condition signal representative thereof;
- means for storing the fetal condition signal;
- means for defining a general purpose network presentation including data representative of the fetal condition signal;
- means for transmitting the presentation to a general purpose display station via a configurable network link upon receipt of a command from the display station, wherein the display station comprises a general purpose computer and a browser that operates to display the network presentation; and
- means for updating the presentation to include updated data representative of the fetal condition.
